POWER GENERATION APPARATUS

Examiner: Z. Best S.N. 10/527,971 Art Unit: 1795 October 23, 2008

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 1 is rejected under 35 U.S.C. 102(e) as being anticipated by Keefer et al. (US 2002/0142208 A1).

Regarding Claim 1, Keefer et al. teach an electrical current generating system (abstract) comprising a fuel cell (202) and a reformer (310), wherein the reformer is adapted to reform hydrocarbon fuel (e.g., methane) into hydrogen and other components (par. 31), and to separate said hydrogen from said other components (par. 31), the apparatus being arranged so that said hydrogen is fed from the reformer to the anode of the fuel cell (par. 31).
